

Chin-Ya (Chelsea) Yueh

312-593-4568 | chinyayueh@gmail.com | LinkedIn | Portfolio

SUMMARY

Experienced in SQL, Power BI, Tableau, R, and Python, focusing on data cleaning, dashboard development, and generating actionable insights across sales, healthcare, and supply chain projects. Gained these skills in under 3 years by delivering real-world projects and adapting to complex data challenges across industries with a strong focus on continuous improvement and learning agility.

EDUCATION & VOLUNTEER EXPERIENCE

DePaul University

March 2025

Master of Science in Information Systems with a concentration in Data Analytics | **GPA: 3.9/4.0**

Chicago, IL

Relevant Courses: Data Analysis and Regression, Health Data Science, Data Warehousing, Python Programming

Certifications: Power BI Essential Training | Accenture Forage Experience

Volunteer: Data Analyst, ChiEAC | Orientation Support, Global International Students Organization

PROFESSIONAL EXPERIENCE

DigWise Technology LTD.

Fall 2024

Data Science Intern (Python, ML, K-Means, DBSCAN)

Hsinchu, Taiwan

- Preprocessed large-scale wafer datasets to ensure data quality for manufacturing yield and performance analysis
- Visualized performance patterns using **matplotlib** and **seaborn** to support engineering decisions
- Achieved a 97% binning success rate by applying clustering techniques
- Evaluated supervised and unsupervised models to optimize yield classification strategies

Alpha Networks Inc.

2021 – 2022

Sales Specialist (Excel, VLOOKUP, PivotTables, SAP, Power BI)

Hsinchu, Taiwan

- Analyzed sales data for 7 key clients and partnered with business analytics team to refine pricing strategy, driving 10% revenue growth and 5% cost reduction
- Extracted and transformed SAP sales data with VLOOKUP and PivotTables to improve royalty calculation accuracy
- Collaborated cross-functionally to align sales data definitions and improve reporting consistency and accuracy

PROJECTS

Mental Health Risk Analysis in University Students (Python, ML, XGBoost, Tableau)

Winter 2025

- Built a Tableau dashboard to visualize demographic trends and recommend data-driven interventions for stakeholders
- Modeled feature importance using XGBoost to identify top 5 risk indicators from 129 variables across 581 students

H&M Personalized Fashion Recommendations (Python, ML, content-based filtering)

Fall 2024

- Processed 28M+ transaction records to support behavior analysis and personalized product recommendation modeling
- Implemented RFM segmentation and behavioral clustering to drive targeting and retention strategies

Data Warehousing Solution for Supply Chain Optimization (SAP Datasphere, SQL, SAP Analytics Cloud)

Spring 2024

- Built SQL-based ETL pipelines and ER models to integrate procurement data into a centralized warehouse for reporting
- Developed SAP Analytics Cloud dashboards to monitor KPIs, reduce lead times, and support vendor decisions

Sports Performance Analytics (R, regression modeling)

Winter 2024

- Conducted data transformation, multicollinearity checks, and residual analysis to prepare for regression modeling
- Built regression models by player position ($R^2 > 0.9$), supporting predictive insights, validated through cross-validation

TECHNICAL SKILLS

Programming Languages: Python(Pandas, NumPy, Matplotlib, Seaborn), SQL, R

Technologies: Excel(VLOOKUP, PivotTables, Power Query), Tableau, Power BI, SAP Datasphere, SAP Analytics Cloud, Snowflake

Methods: Data Cleaning, Regression Analysis, Clustering, Feature Selection, Data Modeling, ETL Pipelines
