

Chelsea Yueh

Chicago, Illinois | 312-593-4568 | chinyayueh@gmail.com | www.linkedin.com/in/chin-ya-yueh | Portfolio

SUMMARY

Data Analyst with hands-on experience in data cleaning, visualization, and reporting across sales, healthcare, and supply chain projects. Skilled in **SQL, Python, R, Tableau, Power BI**, and **Excel** with a background in building dashboards and data models that improve decision-making. Proven ability to adapt quickly, having delivered multiple real-world projects in under three years, and dedicated to turning complex datasets into clear insights that support business outcomes.

EDUCATION & VOLUNTEER EXPERIENCE

DePaul University

March 2025

Master of Science in Information Systems with a concentration in Data Analytics | GPA: 3.9/4.0

Chicago, IL

Relevant Courses: Data Analysis and Regression, Database Programming, Data Warehousing, Python Programming

Certifications: Power BI Essential Training | Accenture Forage Experience

Volunteer: **Data Analyst**, ChiEAC | Orientation Support, Global International Students Organization

TECHNICAL SKILLS

Programming Languages: SQL, Python (Pandas, NumPy, Matplotlib, Seaborn), R

Technologies: Excel, Tableau, Power BI, SAP Datasphere, SAP Analytics Cloud, Snowflake, dbt

Methods: Data Cleaning, Regression Analysis, Clustering, Data Modeling, Data Management, ETL Pipelines

PROFESSIONAL EXPERIENCE

DigWise Technology LTD.

Fall 2024

Data Analyst Intern (Python, ML, K-Means, DBSCAN)

- Preprocessed and validated 1M+ wafer records to ensure data quality for yield analysis, improving reporting accuracy by 15% and reducing downstream data errors
- Built 7+ visual plots that highlighted defect clusters and performance trends, reducing testing time by 15%
- Applied clustering algorithms to classify wafers with 97% binning accuracy, reducing manual review effort by 30%
- Evaluated 3 supervised and unsupervised models to recommend the most reliable yield classification method, which was later adopted as the standard approach for performance monitoring

Alpha Networks Inc.

2021 – 2022

Sales Specialist (Excel, VLOOKUP, PivotTables, SAP, Power BI)

- Analyzed sales data for 7 key clients and collaborated with the analytics team to refine pricing strategy, driving a 10% revenue increase and 5% cost reduction within one year
- Extracted and transformed 50K+ SAP transaction records using Excel to improve royalty calculation accuracy, reducing reporting errors by 20%
- Partnered with finance/business teams to standardize definitions and streamline reporting, improving KPI consistency

PROJECTS

Mental Health Risk Analysis in University Students (Python, ML, XGBoost, Tableau, Excel)

Winter 2025

- Built a Tableau dashboard to visualize demographic trends and recommend data-driven interventions for stakeholders
- Modeled feature importance using XGBoost to identify the top 5 risk indicators from 129 variables across 581 students

H&M Personalized Fashion Recommendations (Python, ML, content-based filtering, Excel)

Fall 2024

- Processed 28M+ transaction records to support behavior analysis and personalized product recommendation modeling
- Implemented RFM segmentation and behavioral clustering to drive targeting and retention strategies

Data Warehousing Solution for Supply Chain Optimization (SAP Datasphere, SQL, SAP Analytics Cloud)

Spring 2024

- Built SQL-based ETL pipelines and ER models to integrate procurement data into a centralized warehouse for reporting
- Developed SAP Analytics Cloud dashboards to monitor KPIs, reduce lead times, and support vendor decisions

Sports Performance Analytics (R, regression modeling, Excel)

Winter 2024

- Conducted data transformation, multicollinearity checks, and residual analysis to prepare for regression modeling
- Built regression models by player position ($R^2 > 0.9$), supporting predictive insights, validated through cross-validation
